Session of Doctoral Student Presentations of Ongoing & Future Research

Tuesday, November 1

Session of Doctoral Student Presentations of Ongoing & Future Research

ARUS Meeting

Panel Discussion with Professors and Determination of Next Meeting

Final words by Dr. Hajo Neis, PUARL

Wednesday, November 2

Guided tour of Portland

ARUS

Advanced Research in Urban Systems

The main purpose of ARUS is the development of expertise and reflexive competences (including occupational prospects in science and practice) for the sustainable development of urban spaces. The scientific studies will enable the graduates of ARUS to work in highly responsible positions due to their competences in identifying, describing and analyzing complex urban problems, in developing solutions and supporting their successful implementation.

PUARL

The Portland Urban Architecture Research Lab

The main purpose of PUARL is to conduct and promote activities in urban architecture research and urban design research: We attempt to integrate wholeness and sustainability into the architectural and urban design process by conducting basic and applied research throughout the Portland region (and also other parts of the nation and the world) in urban morphology, urban building typologies, and urban processes for civic groups, public agencies, professional firms, and development interests.

ARUS Member Universities:

University of Duisburg - Essen: Essen, Germany

University of Oregon in Portland: Portland, Oregon

Jianzhu University - Shenyang: Shenyang, China

Qingdao Technological University: Qingdao, China

Alberto Luiz Coimbra Institute: Rio de Janeiro, Brazil

Middle East Technical University: Ankara, Turkey

Also Invited:

University of Southern California: Los Angeles, California

SCHOOL OF ARCHITECTURE
AND ALLIED ARTS
University of Oregon
